## WELCOME TO VIKAS INSULATION

“ **VIKAS INSULATION** is registered under the companies Act. VIKAS INSULATION is one of the most reliable thermal insulation service providers with an outstanding track record **since 2008**, VIKAS INSULATION is located at Ahmedabad, Gujarat, India and has its presence around the globe in thermal insulation.

VIKAS INSULATION undertakes and executes turnkey projects, shutdown, AMC / ARC for Hot & Cold Insulation. VIKAS INSULATION has successfully undertook multiple turnkey projects at national & international level adding to that also taking AMC/ARC of Refineries, Dairies, Pharmaceuticals, MFG factories & multinationals with total value surpassing in crores.

”

### Our Vision

“Ensure True value add on for innovative capital projects and services globally, with Safety & Environment protection & preservation.”

### Our Mission

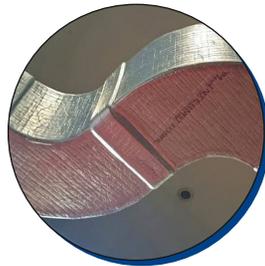

VIKAS INSULATION is driven by its core values. Incorporating these core values into daily work and making them, an integral part of its culture, is the key to VIKAS INSULATION future success. (Incorporating core values as integral part into daily work life culture for VIKAS INSULATION future success)

# THERMAL INSULATION

VIKAS INSULATION executes supply and application of both Hot and Cold Insulation as per the requirements. Material used for Hot insulation are mainly Lightly Resin Bonded Matters (LRBM), Pipe Section, Mineral Wool, Glass Wool, Ceramic Wool, Fiber Glass Calcium Silicate and Foam Glass. For cold insulation are Pre Formatted Thermocol (Polystyrene) and PUF (Polyurethane Foam), Foam Glass, Armoflex, Nitrate Rubber etc.

# DUCT INSULATION

Duct insulation done with Fiber Glass, Glass Wool, Thermocol/Polyurethane Foam (PUF), etc. to reduce thermal loss & improve effective system. VIKAS INSULATION has the supremacy in providing Duct insulation.

# POWER DUAL INSULATION

VIKAS INSULATION provides services for powering dual Insulation by poly isocyanate rate (PIR). This special material is preferred for its fire extinguishing & fire retardant properties. The best quality material is used both in Hot/Cold insulation.

# SCAFFOLDING

VIKAS INSULATION provides scaffolding services with steel tube structures during application of Hot/Cold insulation works & maintenance. VIKAS INSULATION take adequate safety precaution during erection of scaffoldings.

# MAINTENANCE

VIKAS INSULATION provides maintenance services for thermal insulated pipe lines, Tanks, Vessels, Reactors and Air Ducts. The services include removal, re-insulation and cladding, VIKAS INSULATION are at presently carrying out ARC at various govt. companies.

# FABRICATION

A fabrication industrial line is a specialized manufacturing facility focusing on precision processes like welding, producing specific components for industries such as automotive and aerospace, often catering to niche markets with agility and flexibility.

GoGreen
